14. DESCRIPTION OF AMENDMENT/MODIFICATION (Organized by UCF section headings, including solicitation/contract subject matter where feasible.)							
The purpose of this amendment is to extend the closing date for receipt of proposals, increase the Total Maximum Contract Value, and add a paragraph to the Executive Summary Letter. These three changes are made as follows:							
1. In Article B.1, <u>Items Being Acquired/Total Price</u> , Paragraph (a), <u>Base Contract</u> , the Total Maximum Contract Value is increased from \$50,000,000.00 to \$200,000,000.00.							
2. The date for receipt of offerors, as specified in Block 9 of the <u>Solicitation, Offer and Award, SF 33</u> , and in Provision L.9, <u>Time, Date and Place Proposals are Due</u> , Paragraph (a), <u>Bid/Proposal Submission by U.S. Mail</u> , is extended to April 18, 2001.							
3. The following paragraph is added to the Executive Summary Letter:							
"The intent of an Energy Savings Performance Contract (ESPC) is to provide a mechanism to finance energy infrastructure improvements at Federal facilities using the energy cost savings that result from those improvements. Hence, any offsite investments are outside the scope of the BAMF ESPC, even if the investment is required in order to implement a BAMF project, such as investments in equipment, systems or operations that are required to acquire, produce, process or transport the BAMF. Likewise, a performance contract would not be appropriate for the simple purchase of green power that is generated by an external source since such a purchase would not require any infrastructure improvements at the Federal facility. Please review Section C.2.1 for further explanation. As stated in Section C.2.1, power generated on-site may be sold as green power with the revenues reflecting in the delivery order price schedule."							
Except as provided herein, all terms and conditions of the document referenced in Item 9A or 10A, as heretofore changed, remains unchanged and in full force and effect.
